Services offered by BEC encompass the following areas:

- Air Quality, Wastewater Discharge and Industrial Environmental Permitting
- Air Quality, Wastewater, Hazardous Waste and Energy Reporting
- Environmental and Energy Regulatory Compliance Assistance
- Environmental and Safety Planning
- Air and Water Sampling

OVERVIEW

Berkshire Environmental Consultants, Inc. (BEC) offers a range of environmental and energy compliance and engineering services for industrial clients. A woman-owned company founded in 1995 in Pittsfield, Massachusetts, BEC's expertise includes environmental permitting, environmental and energy regulatory reporting, environmental and energy compliance, and environmental and safety planning. BEC also offers expert indoor and ambient air sampling, and industrial wastewater and stormwater sampling.

BEC engineers, scientists and regulatory specialists provide technical environmental expertise and detailed up-to-date knowledge and experience in the implementation of environmental and energy regulations.

Philosophy

Professional Commitment
BEC strives to be a high caliber and professional organization to serve our clients. BEC is a small business whose engineers and scientists have earned a reputation of consistently providing quality environmental engineering services specifically in environmental permitting, compliance and sampling.

Technical Expertise
BEC provides technical professionals with technical expertise and a staff dedicated to serving the industrial needs of clients.

Personal Attention
BEC provides quality and personal attention rather than trying to be all things to all people. The intention is to provide our best ability to a manageable number of clients. BEC has been able to provide performance of all work orders by high quality environmental services at an affordable cost.

Providing the Help your Company Needs
BEC provides our clients with the help they need to effectively manage the complex and regulatory aspects of their business. Our intention is to help companies and regulatory agencies understand the regulations that affect them from the environmental compliance and regulatory side and allow them to better understand the process the high quality technical products, provided in a clear and understandable form. Beyond that, we will help you understand what you need to do to ensure that you are meeting the best strategies for compliance.
